Cleaning & Maintenance

Aluminium

Clean with non-corrosive, non-abrasive cleaners to ensure the logevity and pristine appea-
rance of aluminium surfaces.
Avoid the use of scrubs pads or
pressure cleaners, as these may
cause damage.

Aluwood

Clean regularly with lukewarm
water and neutral pH detergent
using a non-abrasive sponge or
brush. Rinse thoroughly and, if
desired, finish with quality wax
polish. Avoid abrasives, acids,
alkalis, solvents, hot surfaces
above 25 °C, and standing water
or concrete residues.

Fabrics

Clean with mild soap using
a sponge or cloth. Be gentle
during the cleaning process;
avoid aggressive scrubbing
of the seater. After cleaning,
ensure you remove any excess
soap.
For stubborn stains, use diluted
household bleach. Act promptly
to clean stains; the longer they
linger, the more challenging they
become to remove.
