Maintenance

Aluminium

Protect surfaces with barrier elements like film, paper, and peelable lacquers before placement and handling. If accidental contamination or splashing of strong alkalis or acids occurs, wash the affected area with a large amount of clean water, especially cut-outs or holes and cavities.

Teak

We recommend treating the wood with Kettal sealer (KS5707500) every three months, or more frequently in the case of hotel and catering establishments. To restore the teak to its original appearance, sand the entire surface and apply the sealer.

Discover more about the Teak cleaning process [right here](#).
