1/3

This ironical intervention on the conventional upholstery converts a regular backrest into two independent 'wraps' connected by colorful straps. A graphical aluminum structures frames the protagonist of this chair, the cushions.

Cleaning & Maintenance

Aluminium

Clean with non-corrosive, non-abrasive cleaners to ensure the logevity and pristine appearance of aluminium surfaces. Avoid the use of scrubs pads or pressure cleaners, as these may cause damage.

Teak

We recommend treating the wood with Kettal sealer (KS5707500) every three months, or more frequently in the case of hotel and catering establishments. To restore the teak to its original appearance, sand the entire surface and apply the sealer.

Discover more about the Teak cleaning process [right here](#).
